

National Swine Improvement Federation

ACKNOWLEDGEMENTS

PREFACE

I. INTRODUCTION

II. GENETIC PRICIPLES

Genetic progress through selection

Breeding value and expected progeny differences

Predicting genetic progress

Selection indexes

III. ON-FARM PROGRAMS

Procedures

Base program

Within-herd EPD programs

Across-herd EPD programs

Commercial program

Selection indexes

Health program

Merchandising

IV. EVALUATING MARKET HOGS USING A LIVE-PRODECTION TO CARCASS-MERIT APPROACH

General considerations

Steps to determine pounds of quality lean pork gain per day on test

Production information

Transforming the hog to pork

Carcass information

Equations to predict composition

V. CENTRAL TEST PROGRAMS

Entry requirements

Health program

Testing procedures

Recommended indexes

Reports

Sale qualifications

VI. POST-TEST MANAGEMENT OF BREEDING STOCK

Post-test management of boars

Post-test management of gilts

Management of newly purchased breeding stock

Evaluating boar reproductive soundness

Minimum breeding ages for boars and gilts

VII. REFERENCES

VIII. APPENDIXES

A. Nutrition

- Nutrition for optimal performance**
- Nutrient recommendations**
- B. Ear Notch System**
- C. Segregated Early Weaning**
- D. Live Evaluation**
 - Genetic abnormalities**
 - Structural soundness**
 - Underline soundness**
 - Porcine stress syndrome**
- E. Selection indexes**
 - Parameter estimates**
 - Economic values**
 - Calculation of economic values**
 - Analysis procedures for calculating indexes**
 - Example calculations for indexing pigs**
- F. Glossary**
